

## Playing back from a USB memory stick

1. Insert the USB memory stick you used to record from your DVR into your computers USB port.
2. Your computer will recognise the USB stick.
3. Your computer may automatically open the USB sticks contents in a folder. If nothing happens. Go to 'My Computer' (icon should be on your desktop) and click the USB Stick icon to open the folder.
4. Once you have the USB stick contents folder showing, click on 'F4viewer'.
5. This will start the video viewer application.
6. Click 'Load' on the video viewer.
7. Navigate to the file you recorded on your USB stick from the load dialog box. This will be named by 6 number corresponding to the time you took the recording from the DVR e.g. 093218.
8. Double click the file to select it.
9. The video event will start playing automatically.
10. Use the other buttons and options on the video viewer to navigate through the recording as required.
11. When you have finished viewing, close the viewer and safely remove the USB stick.
